(#4) You will be given the following phrase. At long last... You must remember the #order of the elements. Player Name, you've returned! Tell me, have you solved Winebaud's riddle? But I have rambled enough, and you must be rewarded! Allow me to share with you a verse written by my favorite poet Clandestine rendezvous leave me breathless and wanting obsession consumes me, a thirst for the taboo. Where did it lead you? These are Winebaud's Message. Over and over again, until the end." Gods, he said it so many times it's been stuck in my head ever since! Most interestingly, in the german version of the game the direction for the characters to be shifted is reversed (-+ instead of +-). A dead man cannot pay a finder's fee, after all. Tasking players to solve a collection of particularly nasty brain teasers, you'll be sent back and forth across Eorzea's vast expanses in search of a multitude of long-lost secrets. Amazing! Though the content was rather disappointing, now that I think on it. Contents Square EnixFinal Fantasy XIV's Eorzea is an ever-expanding universe filled to the brim with quests for players to undertake. One of these is FFXIV's "The Greatest Story Never Told," a riddle-based quest that will send your Warrior of Light on a fun-filled adventure across Eorzea. It can't be the other way around, or the O + O column would carry a 1 into the W + W column, which could not then have an even result, which G is known to be. (#5) For this you will need to combine the 6 lines of poetry from the last 3 riddles. Doubtless you have heard stories — some more flattering than others. (#2) Checking Winebaud's Message again gives you your next clue. Don't worry, we've got them all below for you in different steps. "Isouda knows the truth." She gives you another riddle to figure out. SWORD + SWORD = DAGGER is a puzzle in which each letter represents a digit 0-9; each letter represents the same number every time it appears, and each letter represents a different number. This gives you a phrase with some letters capitalized. This means that D = 1; the sum of two five-digit numbers can only be a five-digit number or a six-digit number starting with 1. 180504 130114200919 0601121219 RED MANTIS FALLS Eastern La Noscea (16,27), beneath an overpass, looking west toward the falls. does the wheel turn anew? G cannot be 0, because G + O = G would require O and G to both be 0. Here's how to complete this perplexing series of events. Instead, the quest requires that the player solve a series of puzzles across Eorzea in order to progress. This series of elements is important to deciphering the scrambled text. This "step" nonsense reminds me of the time he tried to critique the form of my Elzen associate. Who are you. I wonder, and why have you come this far? I know "the truth?" That does not sound like something the Winebaud I knew would write. The text that was part of Winebaud's note is a clue to the location of a ??? You had to do what to trigger the message? A message written in magicked runes? Memenugu is in Central Thanalan at (21,25), at the waypoint Fesca's Wash. For now, let us focus on the next riddle, which I've just finished translating. I have deciphered another passage, only to find myself confronted with yet another inscrutable riddle. (#1) Checking the Winebaud's Message point of interest will reveal a series of scrambled letters above the following message: FIRE / LIGHTNING / WATER / EARTH / ICE / WINDThe wheel must turn anew. I was expecting a clue to the treasure's location. A must be odd, because S + S = 2 x S would be even, but we have S + S + 1. He was cantankerous and contrary to a fault. 2 and 4 are both known already, leaving 0, 6, and 8 as possibilities. So the maximum value for the six-digit number is 98,765 + 98,765 = 197,530. You will get one of three riddles to solve, either "Memenugu knows the steps." (for numbers), or "Jahlle knows her sums" (for numbers), or "Isouda knows the truth" (another riddle). Each puzzle has several different variations and solutions, and each variation is chosen randomly, meaning that each playthrough of this quest can differ. Bah, never mind. Talk to Valiant Hart and he will read them out one by one. Oh, I almost forgot! I've finished translating another riddle. The columns O + O and W + W both produce G; the only possible explanation is that O + O = G (nothing carried into that column) and W + W = 10 + G (nothing carried into that column). As per usual, head back to The Silent King to receive the third piece of this perplexing puzzle. Return to The Silent King statue and interact once more You will be given one of the following clues: "Memenugu knows the steps" (literacy puzzle) "Jahlle knows her sums" (numeracy puzzle) "Isouda knows the truth" (riddle) Memenugu (Fesca's Wash, Central Thanalan) Memenugu's puzzle is a literacy one, where you'll need to use the next letter (so "A" translates to "B") in order to solve the cipher. You will now need to travel to your home nation and talk to one of these NPCs to find out the list. Interact with the text It will be random scrambled letters (in the form a / b / c / d / e / f), followed by FIRE / LIGHTNING / WATER / EARTH / ICE / WIND. Each two numbers correspond to a letter in the alphabet (01 is A, 02 is B, and so on). "Jahlle knows her sums." She gives you the way to decipher the second coded message. Your next clue reads "the members of the Marauders' Guild understand the importance of etiquette," with some letters capitalized. This "sums" nonsense reminds me of all the times he argued with me over his bill. Whenever I pointed this out, he would offer the same insufferable retort: "The opposite of nonsense is sense." I have never been a violent person, but that old man nearly made me one.
